I am a Ph.D. candidate in Political Science at the [University of Utah](#), where I also completed a Masters of Public Administration (2017). I study public administration, policing, and emotional labor theory. I am particularly interested in the consequences of work-place surveillance on front-line public employees. That line of research has been strongly motivated by the example of body-worn cameras in policing.

My work is multidisciplinary, focusing at the nexus of public administration and policing research. My work has been published in top journals in both fields, including *Public Administration Review* and *Justice Quarterly*. I have been honored as a 2018 *American Society of Public Administration* Founders' Fellow, and a 2020/2021 doctoral fellow of the *Academy of Criminal Justice Sciences*. I maintain a personal website with a current CV and publications at www.ianadamsresearch.com.
